Summary

Frontend Developer (React.js)

Experience: 3+ years

☐ **Professional Summary**

Frontend developer with over 3 years of experience in building responsive and user-friendly web applications using **React.js** and modern JavaScript technologies. Skilled in developing scalable, maintainable interfaces with focus on clean code, performance, and seamless user experience. Experience across different domains including e-commerce, legal, military, and streaming services.

Technical Skills

Languages & Frameworks:

HTML5, CSS3 (SASS/SCSS), JavaScript (ES6+), React.js, Redux / Redux Toolkit, TailwindCSS

Tools & Libraries:

React Router, Axios, Context API, Git, GitHub

Design & UX:

Responsive Design, UI/UX principles, Figma (if applicable)

Other:

REST API integration, Agile workflows, reusable components, performance optimization

☐ **Key Projects**

E-commerce Web Application: Built a modern online store frontend with dynamic product listings, cart system, and checkout. Focused on smooth UI and responsiveness.

⚖ CRM Platform for Law Firm: Developed an internal tool for managing clients, cases, and deadlines, tailored for simplicity and daily use by legal professionals.

Military Mapping Tool: Created an interactive web-based GIS app with distance, route, and area calculations. Focused on geolocation features and visual clarity.

nVidea Streaming Platform: Implemented the UI for a Netflix-style streaming service with content browsing, categories, profiles, and favorites.

☐ **Languages**

English: Professional working proficiency

Serbian: Native

☐ **Availability**

Open to full-time, part-time, or freelance positions. Remote and hybrid roles welcome.
